PROFESSIONAL SUMMARY

Full Stack Developer with 8+ years of experience building scalable web applications, eCommerce platforms, and custom CMS solutions using React.js, Remix.js, Node.js, Shopify, PHP, Python, and GraphQL. Strong background in frontend architecture, backend integrations, performance optimization, and responsive UI development. Experienced in building production-grade applications and delivering high-quality user experiences across Shopify, WordPress, and custom platforms.

TECHNICAL SKILLS

Frontend: React.js, Remix.js, Next.js, JavaScript, TypeScript, HTML5, SCSS, Tailwind CSS, Shopify Liquid, Responsive Design.
Backend: Node.js, Python, Flask, Django, PHP, Java, GraphQL, REST APIs, Shopify APIs, Microservices.
Databases: PostgreSQL, MySQL, MS SQL Server, MongoDB, Prisma ORM.
Cloud & DevOps: Docker, AWS, Google Cloud Platform (GCP), Linux CLI, Bash Scripting, CI/CD Pipelines.
Tools & Workflow: Git, GitHub, GitHub Copilot, VS Code, Postman, Jira, Click Up, BugHerd, ChatGPT, Gemini, Codex.
Engineering Practices: System Design, MVC Pattern, SEO, A/B Testing, API Integrations, Agile Development, Code Reviews.

PROFESSIONAL EXPERIENCE

Full Stack Developer | Golfteamproducts | Remote (Jun 2023 – Present)

- Spearheaded the development of a Shopify Plus–Acumatica integration CRM platform using Python, GraphQL and Liquid that automated job card generation for over 2,000 custom orders per month, reducing manual processing time by 90% and decreasing fulfillment times by 2 days.
- Architected and launched a high-performance React based Shopify product discovery app supporting 5,000+ products and 10,000+ variants, enabling golf coaches to quickly identify team-specific apparel and equipment through advanced filtering powered by GraphQL, metafields, and metaobjects.
- Designed a database-backed caching architecture and automated Python synchronization service that reduced product search load times from approximately 90 seconds to under 5 seconds, improving coach purchasing workflows, increasing product visibility during peak-season ordering, and contributing to higher sales.
- Architected and delivered a one-click customization platform for a Shopify Plus storefront serving 6,000+ golf teams, enabling customers to instantly personalize apparel and equipment with team-specific logos while eliminating a previously manual multi-step ordering process.
- Engineered a Fabric.js-powered rendering engine that generated real-time customization previews across multiple product variants, accurately positioning logos using coordinate-based placement algorithms derived from Adobe Photoshop design specifications and driving over 2million+ sales.
- Led the migration of a Shopify React application from SQLite to PostgreSQL on cloud servers, eliminating manual backend activation after deployments, enabling persistent authentication, and increased uptime to 100%.

Frontend Developer | Cali Wear SD | San Diego, CA (Sep 2025 – Feb 2026)

- Led the end-to-end redesign of a Shopify storefront, modernizing the homepage using Adobe Photoshop, Cap Cut AI, and Google Gemini which increased customer engagement by 25% and optimized product discovery and contributing to a 20% increase in online revenue.
- Developed detailed prompt engineering techniques and post-processing workflows to generate production-ready SEO-optimized images while maintaining brand consistency across thousands of product images improving customer acquisition and retention by 30%.

- Designed and executed seasonal email marketing campaigns for promotions by using AI-generated creative assets increasing promotional campaign revenue by 30% while improving customer engagement and repeat purchases.
- Improved local search visibility, strengthened brand presence across multiple locations by consolidating 4 retail locations into a unified Google Business Profile ecosystem and implementing SEO-driven product listings using Google Business Profile, Google Search Console, and Google Analytics.
- Conducted competitive analysis of leading retail brands to identify modern e-commerce merchandising strategies, translating insights into UX, SEO, and storefront improvements that enhanced product discoverability.

Web Developer | Threeomens | Remote (Nov 2019 – May 2023)

- Developed and maintained 50+ custom WordPress and Shopify websites, translating Adobe XD designs into responsive, pixel-perfect user experiences using HTML5, SCSS, JavaScript, jQuery, PHP, and WordPress, while delivering reusable, modular, and maintainable code that simplified long-term client maintenance.
- Built custom WordPress themes, plugins, and CMS solutions using Advanced Custom Fields (ACF) and native WordPress APIs enabling non-technical clients to easily manage website content and media without requiring developer assistance.
- Collaborated closely with designers, copywriters, and stakeholders in an Agile Scrum environment by translating business requirements into actionable JIRA tasks, and consistently delivering features within project timelines, contributing to strong client retention and supporting agency revenue growth beyond $1M.
- Managed the complete website deployment lifecycle across development, staging, and production environments using WP Engine, coordinating client review cycles, QA testing, DNS configuration, and production releases to ensure reliable and seamless website launches.

Growth Analyst | Rock My World Media Inc | San Diego, CA (Sep 2016 – Sep 2019)

- Developed automated reporting pipelines using Python, SQL, and Tableau to monitor KPI's enabling cross-functional teams to make data-driven product and marketing decisions.
- Automated recurring analytical workflows and executive reporting processes using Python, SQL, and Excel Pivot Tables, significantly reducing manual reporting effort while improving reporting consistency and operational efficiency.
- Delivered analytical insights that supported approximately 20% growth in user acquisition and 25% revenue growth by providing timely, accurate reporting that informed marketing strategies, product enhancements, and customer retention.
- Queried and analyzed large-scale application data from MySQL and PostgreSQL databases using advanced SQL techniques to deliver accurate reports on user engagement, music streaming behavior, fitness activity, and application performance.

Program Analyst | Cognizant Technology Solutions | Chennai, India (Jul 2011 – Jul 2014)

- Diagnosed and resolved complex production issues including TeamSite/LiveSite server failures, workflow interruptions, deployment failures, and content publishing errors, minimizing downtime and ensuring timely resolution of business-critical incidents.
- Supported enterprise web applications built on Java/J2EE technologies including Servlets, JSP, XML, and Web Services, assisting with application deployments, environment configuration, and production issue resolution.

EDUCATION

Master of Science in Information Systems – San Diego State University, San Diego, California
Bachelor of Engineering in Computer Science – Anna University, Chennai, India
